Energy Manager, Facility  
Manager, Finance Manager,  
Energy Engineer, Building Owner,  
Building Technician, Individual  
interest on Energy Management  
System,

Program summary

The financial assessment is an essential tool to determine whether the energy conservation or efficiency measures are feasible to implement.

Besides, the economic review is critical to gain the top management approval to implement the energy conservation and efficiency project.

Therefore, in this course, the participant will learn four (4) methods of financial assessment. It is suitable for non-technical and technical staff involved in the implementation of energy and cost-saving project.

## Our Trainer

Mr Mohamed Hafiz Isa

He is lecturer with 17 working experience in Environmental, Sustainability, and Governance and also a Certified Professional Trainer. He had more than 10 years experience in setting up a Sustainable Energy Management System, performing Energy Audit and verifying energy and cost-saving based on International Performance Measurement and Verification Protocol
