

SHORT COURSE

GREEN PROJECT MANAGEMENT

Meet Our Trainer

Ts. HASBULLAH HARUN

He is a certified project manager, obtained from Projektsyrning AB, Sweden, in 1995, and a certified professional project manager (PMP) from PMI in 2008. Involved in managing prestigious engineering and IT projects in Malaysia since 1990 for both Government and Private Sectors in Malaysia. Such projects are Baram Offshore, KLIA-TAMS, Electronic Government, and Military Integrated Logistic System. He is also a trainer for Project Management certification under Telencorp graduate reskilling program for more than 200 graduates. He also participated as a national council member for the Malaysian Project Management and Asset Management Association from 2012 through 2018. He was involved in the development Project Management Certification program and Facility Management code for CIDB. A Registered Electrical Energy Manager (REEM) under the Energy Commission Malaysia and certified as Professional Technologist (Green Technology) by MBOT and involved in more than 30 energy audit projects for industrial and commercial buildings. Responsible as REEM for several commercial and industrial installations for EMEER regulation. Currently, a Lead Assessor for Energy Management Gold Standard (EMGS) certification under ASEAN Energy Management Scheme and participate in more than 150 assessments. He was recently involved in developing a Financial Mechanism for the Malaysian Green Data Centre and developing the Standard for Sustainable Energy Management System certification with MGTC.

This course aims to provide a basic understanding of the fundamentals of green project management especially for managing energy-related or non-energy related projects which require some understanding of green requirements.
